\* Patent pending

## Combat Proven Sniper Support Platform

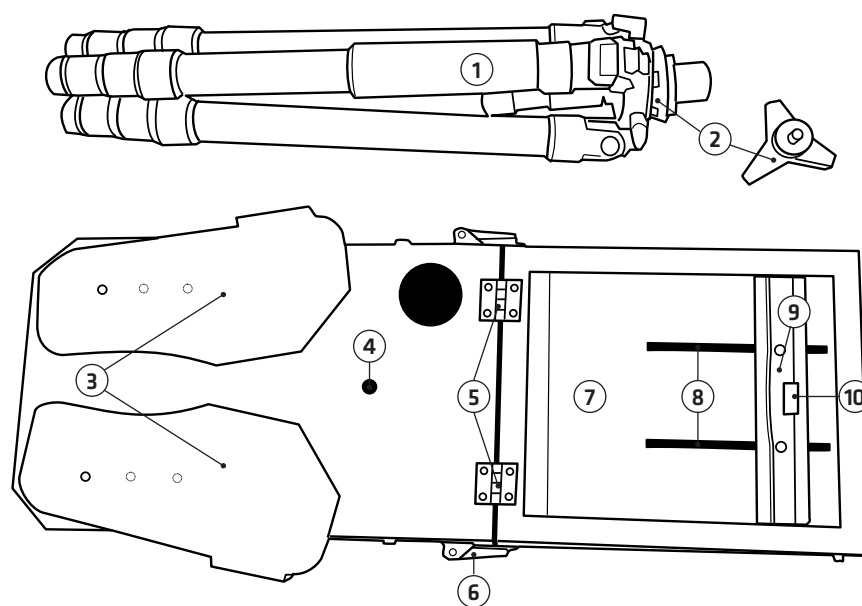

The Tactical Sniper Bench (TSB) is a tripod mounted portable shooting bench, developed by Israeli Special-Forces sniper team veterans.

The special design of the TSB enables target engagement in any position, sitting or standing, with the same accuracy as prone position while allowing the following additional benefits:

- A comfortable long stay with maximum stability
- Full elbow support
- Designed to accept specialized camouflage kits & rain covers (sold separately)
- Enables comfortable arrangement of equipment
- Light weight and portable

The TSB has revolutionized the way Israeli sniper teams operate, maximizing their ability to allocate positions and provide optimal results, ensuring that a single shot will hit its mark.

The TSB is currently in wide spread use by Israeli military and police Special Forces and special Counter-Terrorist strike teams.
